

SCAFFTAG

Scafftag offers a unique set of advantages in managing safety risk assessments within your workplace. The comprehensive Scafftag range can be used for most applications. Insert designs are available in a range of standard wordings which clearly mark information or a danger, but can be easily customised to suit your needs. Weatherproof, UV protected and durable, this cost effective system can withstand the toughest industrial environments.

The Scafftag 3 Stage System

1. Attach an appropriate holder to your application. Before an assessment, the prohibition symbol and words "DO NOT USE EQUIPMENT" are clearly displayed on the holder.
2. Select an appropriate insert and complete the information needed for reporting of the inspection. Inserts are available in a range of colours and scripts to suit various applications.
3. On satisfactory completion of the application test or inspection, write the next test or inspection date on reverse side of insert and place in holder. Equipment is now fit for use.

Scafftag Mk I

Scafftag Mk II

Scafftag Mk I

The Mk I system fits all standard tube fit scaffolding. The Mk I Loading Colour Coded inserts incorporate informative graphics and inspection details on the front face. Inserts are colour coded according to load (Light Weight, Medium Weight, Heavy Weight or Special Purpose). Complete Kit includes: 10 holders, 10 status inserts and 1 permanent marking pen.

Scafftag Mk II

The Mk II holder features a large attachment port, making it suitable for system scaffold components. Complete Kit includes: 10 holders, 10 status inserts and 1 permanent marking pen. Along with the added option of the Blue Book, the Scafftag safety system is internationally used and recognised to assist with the control of scaffolding from first build to dismantle.

The Blue Book

The Blue Book collects together all the elements you need to manage scaffolding systems in one, easy reference, loose leaf binder.

- Section 1 – details the components available within the Scafftag system. It also contains details of legislation and standards so you are aware of the safety requirements.
- Section 2 – contains Handover Certificates that confirm a scaffold is safe and ready to use.
- Section 3 – contains Inspection Reports which should be completed at every inspection.
- Section 4 – contains Fault Notification forms advising of details of any faults.

857190	Scafftag Mk I Loading Insert – Heavy Weight	50
857191	Scafftag Mk I Loading Insert – Medium Weight	50
857152	Scafftag Mk II Complete Kit	
857150	Scafftag Mk II Holder Kit	10 (holders only)
857153	Scafftag Mk II Standard Insert	50
857313	Scaffolding Blue Book	
857227	Permanent Marking Pen	

UNITAG

UNITAG is designed for the identification and qualification of lifting equipment, industrial plant, valves and calibration equipment, as well as a variety of other applications. Plastic, stainless steel or nylon covered galvanised wire strops are available in differing lengths (6, 9 and 12") to suit your attachment needs. UNITAG inserts are offered in a wide range of colours to help visually indicate different months or periods. See listing below for details.

Part No.	Description	Quantity Per Pk
857251	UNITAG 6" Plastic Strop Kit	
857253	UNITAG 9" Plastic Strop Kit	
857250	UNITAG 12" Plastic Strop Kit	
857252	UNITAG 6" Nylon Covered Wire Strop Kit	
857310	UNITAG 9" Nylon Covered Wire Strop Kit	
857309	UNITAG 12" Nylon Covered Wire Strop Kit	
857272	UNITAG 6" Stainless Steel Strop Kit	
857273	UNITAG 9" Stainless Steel Strop Kit	
857308	UNITAG 12" Stainless Steel Strop Kit	
857289	UNITAG Safe Working Load Insert – Green	20
857292	UNITAG Safe Working Load Insert – Yellow	20
857290	UNITAG Safe Working Load Insert – Red	20
857288	UNITAG Safe Working Load Insert – Blue	20
857291	UNITAG Safe Working Load Insert – White	20
857277	UNITAG Next Inspection Due – Green	20
857279	UNITAG Next Inspection Due – Yellow	20
